The lands of Manu, named after its original creator. It is one of the many spheres in the multiverse, where the Grigori led by Ra Horakhty decided to hide after the beginning of the war against the Nefandi.

Description

It is a practically virgin world, created and watched over by Manu, on orders from The Source for experiments with plants and light magic. For many sentient races, it could be considered a paradise. The geography is very varied, organised into several mega-continents. According to Nefandi research, it is home to several powerful artefacts that were hidden in the wilderness at the beginning of the war.
